

Adding the Text Gadget

The **Text** gadget displays your specified HTML text on the dashboard.

i This gadget is only available if your JIRA administrator has enabled it. It is disabled by default because it is a potential security risk, as it can contain arbitrary HTML which could potentially make your JIRA system vulnerable to XSS attacks.

To enable the text gadget: Choose **> Add-ons**. The 'Find add-ons' screen shows add-ons available via the [Atlassian Marketplace](#). Choose **Manage Add-ons** to view the plugins currently installed on your JIRA site. Enable the **Text** module in the **Atlassian JIRA - Plugins - Gadgets Plugin** (You need to select the System add-ons from the drop-down).

Manage Add-ons

You may install, update, and enable/disable add-ons here. [Find new add-ons](#).

If you cannot enable the text gadget, please contact [Atlassian Support](#) for assistance.

What does it look like?

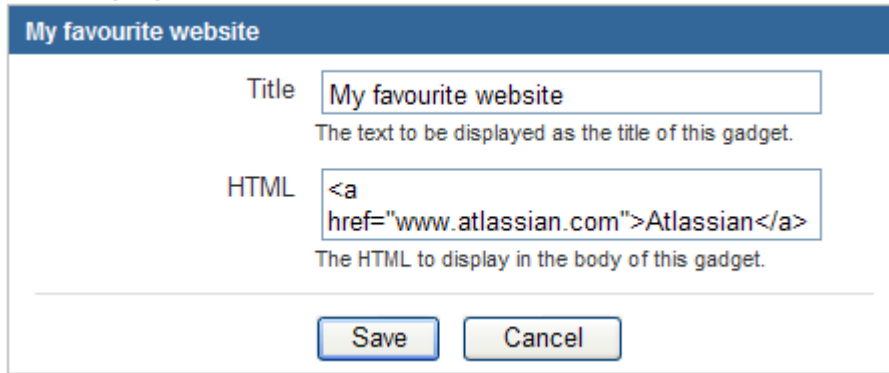

The **Text** gadget should appear as follows on the dashboard:

Adding the 'Text' Gadget to your Dashboard

1. Go to your JIRA [dashboard](#) and click '**Add Gadget**'.
2. The '**Gadget Directory**' will appear. Locate the '**Text**' gadget and click the '**Add it Now**' button. Then click the '**Finished**' button at the bottom of the Gadget Directory.

3. The Text gadget will appear on your dashboard as follows, ready for you to configure:

The screenshot shows a configuration dialog box for a gadget titled "My favourite website". The dialog has a blue header bar with the title. Below the header, there are two input fields. The first is labeled "Title" and contains the text "My favourite website". Below this field is a small text label: "The text to be displayed as the title of this gadget." The second input field is labeled "HTML" and contains the code "Atlassian". Below this field is another small text label: "The HTML to display in the body of this gadget." At the bottom of the dialog, there are two buttons: "Save" and "Cancel".

- a. **'Title'** — type a heading for this gadget.
 - b. **'Body'** — type the body text; this may include HTML.
4. Click the **'Save'** button.

To move the gadget to a different position on the dashboard, simply drag-and-drop. You can also [change the look and behavior](#) of the gadget.
